

Gangamai College of Education Energy Conservation Policy

The institute believes in energy conservation and ensures that reasonable effort is made to conserve energy. The energy policy of the institute promotes environmentally responsible practices and behavior, experiment with innovative solutions, combine learning and practical application and add education value. It also thus abides by regulatory compliance and cost savings. The institute emphasizes cohesive planning to enable resource efficient, inclusive and sustainable approaches to enhance energy management for improved livability, health and climate.

A designated administrator will be responsible for energy conservation. With industry specialists to conduct audit and provide timely feedback. All personnel including students. Mentors and institute staff wholeheartedly take energy conservation as their responsibility.

Accurate records of energy consumption and cost will be maintained by the Energy administrator.

Maximum use of clean energy by harnessing the renewable energy notably use of solar energy in the campus to reduce pollution from primary light generation using fossil fuel.

Use of Energy efficient fixtures throughout the campus to conserve energy and save operational cost of building. Updating the fixtures time to time as per technology advancement (switching from Incandescent light to CFL, CFL to LED). Use of energy star rated or equivalent products to reduce energy consumption.

Further to promote a safe healthy environment and to complement the energy conservation program institute shall adhere to preventive maintenance.
